PROFILE INFO

Hi there! I'm Christian and I'm a Frontend Web Developer, I've knowledge of the main web technologies such as HTML, CSS, JAVASCRIPT. I've also used REACTJS, REDUX and TYPESCRIPT on my last projects.

I recently joined a bootcamp (Academlo) where I learned and put into practice most of the latest and most used technologies specially for Front-End development.

I'm always open to keep learning whatever is needed for the projects I'm working on.
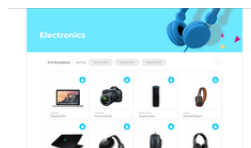

PROJECTS

Here you can check out a few of many projects I've done. You can check out all my projects from my website. (Click on the project image in order to display it)
